IT teams want to get tools into the hands of users quickly, but onboarding new third parties, vendors, or suppliers can be a time-consuming and repetitive process – one that’s ripe for automation.

Included with BeyondTrust Privileged Remote Access, Vendor Onboarding reduces the manual overhead of managing vendor teams and third-party users by delegating portions of the vendor user administration to trusted sub-admins or vendor admins. This streamlined process eliminates the risk of shared accounts while providing an easier path to adding new vendor users.

Three Steps to Enable Vendor Onboarding:

1. Create A Group Policy

Once the administrator defines policy settings for the new Group Policy, he can assign a Vendor Admin to that policy. The Vendor Admin can then manage the onboarding and offboarding of managed users for the specified policy.

2. Create A Vendor Group(s)

The delegated administrator for each group can add or remove users themselves, and the assigned group policy ensures the correct level of access is enabled for all users in that group.

3. Enable a Vendor Portal

Administrators can create and customize portal pages for specific vendors, allowing users to register for the access they need, when they need it. The Vendor Portal can be restricted to specific email domains or IP range.

BeyondTrust Privileged Remote Access enables security professionals to control, manage and audit remote privileged access to critical IT and OT systems by authorized employees, contractors, and third-party vendors. Connect from anywhere, to anywhere, with comprehensive features designed to maximize productivity – no VPN required.

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering companies to secure and manage their entire universe of privileges. The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance.
