2021 REPORT
Cybersecurity Trends in Government

Report Highlights
BeyondTrust commissioned a survey of senior federal, state, and local government security professionals across the United States, with 200 responses. (83% in management roles)

Recent government policy actions are galvanizing agency cybersecurity improvements

- **82%** believe the American Rescue Plan will boost government cybersecurity

Perceived cyberthreats are shifting

- **34%** assert improvement will be significant
- **1-3 YEARS**
- **96%** say their cybersecurity budget has adequate funding

PAM is ranked a top security control today and will grow in importance with emerging government programs

- **61%** consider PAM extremely or somewhat important today
- **71%** of respondents expect PAM to maintain or increase its level of importance within 1-3 years

Cyber fears may have peaked – the future looks brighter

- Positive impact of federal initiatives such as the Presidential Executive Order on Improving the Nation’s Cybersecurity and the American Rescue Plan
- Increase in cybersecurity funding, and the confidence to select the right solutions
- A subsiding pandemic that will relieve many IT and security stressors
The BeyondTrust Privileged Access Management (PAM) portfolio is an integrated solution set that provides **visibility and control over the entire universe of privileges** — identities, endpoints, and sessions. BeyondTrust delivers what industry experts consider to be the complete spectrum of Privileged Access Management solutions.

### The BeyondTrust Solution
