

BeyondTrust's Solutions Support Your Compliance with the FBI's Criminal Justice Information Services (CJIS)

Currently, many state and local governments are working towards CJIS compliance. The CJIS security policy from the United States FBI mandates security controls for entities that handle Criminal Justice Information (CJI) and use FBI CJIS systems to perform many job functions. Meeting the requirements set forth by this policy necessitates a comprehensive plan for protecting sensitive criminal justice information from unauthorized access, disclosure, or altering.

The BeyondTrust portfolio of identity security solutions, including comprehensive privileged access management (PAM), provides robust capabilities that can help support agency alignment with CJIS requirements. Our customers rely on us to gain cross-domain visibility and understanding of identities and entitlements, prevent unauthorized access, detect and respond to threats, and manage and audit privileged sessions. With BeyondTrust, agencies can elevate their identity security posture, improve oversight of identities and access, and reduce the attack surface and blast radius of attacks.

Key Outcomes and Benefits

Implement Least Privilege Access

Protect data and reduce potential for unauthorized access by removing admin rights, enforcing least privilege, and implementing a just-in-time (JIT) access model.

Enforce Continuous Authentication

Prevent unauthorized access and protect against use of compromised accounts by enforcing adaptive multi-factor authentication (MFA).

Gain Oversight of Privileged Activity

Support collection of forensics and compliance initiatives with granular privileged session monitoring and reporting.

Enable Rapid Incident Response

Minimize damage and accelerate potential recovery by pinpointing security issues with velocity and precision.

This document is informational and is intended to provide guidance on how organizations may use BeyondTrust products to meet their own obligations under the FBI's Criminal Justice Information Services (CJIS). BeyondTrust is not representing that we are subject to or compliant with CJIS.

Client Success Stories

CITY OF DOTHAN

"BeyondTrust makes it easy to make the case for prioritizing security, especially for government organizations concerned with compliance and audit requirements. All these years after implementation, [using] BeyondTrust is still one of only a few CJIS-compliant options available."

- Davis Hart, IT Division Manager - Customer Service, City of Dothan
