

# Find, Control, and Protect your Paths to Privilege™ with Modern PAM from BeyondTrust

In today's dynamic and increasingly hybrid world, organizations everywhere struggle to find elevated permissions and right-size access, let alone achieve it without inserting convoluted workflows that add friction and impair productivity. Organizations clearly need a more agile and comprehensive approach. Modern PAM picks up where legacy PAM falls short.

Modern PAM from BeyondTrust seamlessly resolves the fundamental challenges of identifying and securing elevated access and Paths to Privilege™ across cloud services, DevOps environments, and hybrid infrastructures. With BeyondTrust, you gain definitive visibility, control, and accountability over the proliferation of identities and entitlements across all your domains and platforms.

BeyondTrust's modern, intelligent approach to PAM enables customers to eliminate security blind spots, efficiently remove standing privileges, and make least privilege easy. Organizations can effectively, accurately, and quickly prioritize their most urgent risks with ML-powered protection that never sleeps, while automated workflows enable their employees to smoothly get the access they need, when they need it, without compromising security.

**Expect more of your PAM with BeyondTrust.**

## Key Security Outcomes

- Fundamental, cross-domain visibility and risk-based understanding of identities, accounts, entitlements, and paths to privilege.
- Drastically reduced attack surface through elimination of standing privileges, identity misconfigurations, and other risks.
- Enhanced operational efficiency through automated JIT access and seamless cloud and SaaS integration.
- Improved compliance and audit readiness, with comprehensive session monitoring and detailed activity logs for automated user access reviews.
- Greater scalability and adaptability to meet evolving IT infrastructure needs.

## Client Success Stories

### FINANCIAL INSTITUTION

#### Billie

"Employees do the maximum using minimum permissions. [Billie] has embraced JIT access as a standard practice and now experiences a notable reduction in standing permissions. The task of reviewing user access has become manageable, thanks to Entitle's system which efficiently supports a modern tech stack on a large scale." Billie

### AI, CYBERSECURITY COMPLIANCE

#### Behavox

"BeyondTrust's solution has impacted our business by giving us peace of mind around the security of our customers' data and also giving us a very robust audit trail to ensure the integrity of that at all times, and allowing us to put in the appropriate safeguards to ensure we're always in front of any potential security vulnerabilities." - Shane Carden, CISO, Behavox

### TOP LAW FIRM

#### Polsinelli

"The approach BeyondTrust takes to Identity Security is one that I think every industry leader needs to be aware of" - Anna Essex, Senior Compliance and Security Analyst, Polsinelli
