

Securing the Modern Workforce with BeyondTrust

Good IT = Good Security

The pathway to a strong security posture is paved by a solid IT foundation, and securing your environment shouldn't create roadblocks to productivity. Today's IT and Security teams are expected to maintain seamless, secure operations with limited resources - while adapting to a constantly shifting modern working environment.

The scope of what it means to "support the business" has expanded far beyond the traditional perimeter. Employees, vendors, and non-human identities have sprawled to the point where existing tools and techniques fall short in enabling proper security and control when performing privileged activities on or off the network.

At BeyondTrust, we believe every interaction, whether human or machine, should be secure by default. Our solutions are built to improve the way you work, driving greater efficiency while naturally strengthening your security posture at every step.

Good IT brings Good Security.

Key Security Outcomes

Understand Your Security Maturity – Strengthen Your Posture

Demystify your state of identity-based risk and pinpoint opportunities for improvement across all identities, human and non human, on premises and in the cloud.

Streamlined Access Management – Give Time Back to the Organization

Provide automated access to sensitive resources, while reducing service desk workload. Unlock productivity for your team and the organization with policy based controls, self service JIT access automation, and secure remote connections.

Improve Security Operations – Increased Readiness for Security Incident Response

Eliminate manual workloads during security incidents with integrated tools, unified logging, and centralized command and control over your identities. Shrink the blast radius of identity based threats with quicker detection and response capabilities.

Secure by Default – Achieve a Higher Security Baseline That's Ready for the Future

Pursue zero trust by eliminating standing privileges. Secure your working environment with full visibility and control over all privileged activities, anywhere.

Get Started Guide

1. Understand your identity security posture
2. Build an action plan to improve your identity security hygiene
3. Be proactive in mitigating identity security risks

- BeyondTrust is offering a complimentary, no-obligation program designed to quickly give you valuable insights into your identity security posture. Learn more at:

Client Success Stories

Birmingham Women's and Children's NHS Foundation Trust

"BeyondTrust's Privileged Remote Access and Remote Support solutions have allowed the Trust to keep its network secure and compliant whilst delivering an improved service to its staff and quickly enabling its third parties to access its systems." - David Marshall, Head of IT

Starburst

"We initially considered building an in-house solution, but Entitle's affordability, ease of use, and comprehensive feature set made it the obvious choice. It not only saved us on additional staffing but also seamlessly integrated into our existing systems." - Shane Dizer, Security Engineering Manager
